

Niamey, Niger, April 4 (Infosplusgabon) - A total of 120 patients have tested positive for covid-19 in Niger, including 115 under treatment and 5 deaths on April 3, said a statement from the Ministry of Public Health.

According to the statement released on Saturday, the health of the patients under care is stable.

Niamey, the capital, has the majority of patients with covid-19. However in Maradi, Tahoua and Konni, virological examinations detected a case in each of the localities.

The first case of coronavirus in Niger was registered on March 19.
