

Kigali, Rwanda, October 4 □ (Infosplusgabon) - Rwanda's COVID-19 recovery rate has reached 66 percent from 50 percent almost one month ago, the ministry of Health indicated in a statement Saturday.

The number of recoveries currently stands at 3,211, the ministry said in its daily update.

As at Saturday, Rwanda recorded a cumulative number of 4,852 confirmed COVID-19 cases, it said.

The total number of tests conducted to date was 502,817 with 2,568 new tests conducted in the last 24 hours.
